

Speaking Introduction

Francesco Gilio

(Introduction to use when introducing Francesco to your audience)

Marketer – Speaker – Journalist – Motivator

In 1974 Francesco Gilio was born with a genetic skin disorder called Epidermis Bullosa. The ramifications of the skin problem were enormous as the top layer of skin comes off at the slightest knock and sufferers develop a whole array of symptoms affecting the whole body. The seriousness of this skin problem is such that most sufferers live quite a poor quality of life and many pass away at an early age

At the age of fourteen Francesco was introduced to Mind/Body medicine by a family member to help him deal with the condition. Mind/Body medicine is about using the power of thought and emotion to affect and heal your body. From then on Francesco embarked on a healing journey using mind/body medicine techniques and since then he has managed to dramatically improve his condition and remove a host of symptoms. Today Francesco will be speaking on how you can use your thoughts and emotions to heal your body

Now 30 years of age, Francesco runs his own communications business offering marketing, speaking and media services to various organisations. He has lectured in marketing at the University Of Western Sydney, is a Certified Practicing Marketer with the Australian Marketing Institute, a recognised Speaker and a freelance Journalist. Francesco holds a Masters in Marketing from the University of Newcastle and a Bachelor of Arts in Sociology from the University Of NSW. He is also currently undertaking a Masters Of Arts In International Communication at Macquarie University. In his spare time Francesco likes to sleep

Could you please welcome Francesco Gilio.....
